

Block 4: Lead Summary – Super Admin Only (Inside Super Admin Panel)

1. General Scope & Access

Access: Strictly for Super Admin inside the Super Admin panel.

Core Function: Post assigning leads, the Super Admin performs management, tracking, filtering, deletion, and reassignment operations.

2. Lead Request Management

Inbound Lead Requests: All lead requests from Users must display under Super Admin / Admin.

Auto-Disappear Rule: Once leads are assigned by the Super Admin, the request must automatically disappear from the dashboard.

Language Distribution: Super Admin receives all leads and shares them with users based on language.

3. Lead Assignment History & Advanced Filtering

Visibility: Complete history of leads assigned to Users by Super Admin or Admin must be visible at Admin and Super Admin levels.

Filtering Options: Super Admin can filter lead history using a dropdown box for each user, and filter datewise, language wise, teamwise, or based on the disposition updated by the user (individually or in combination).

Pagination Control: Super Admin can adjust view density to display 10, 20, 50, up to 1000 leads per page based on selection.

Date Lookup: Navigating to a particular date displays all leads previously assigned to users by the Super Admin on that instance.

4. Real-Time Disposition & Status Tracking

Instance Tracking: Upon opening an assignment history instance, Super Admin can view:

Total leads uploaded/assigned in that instance.

Count of dialed leads.

Count of uncontacted leads left.

All kinds of disposition statuses updated by users in their assigned lead panels.

5. File & Granular Lead Operations (Deletion & Reassignment)

File Level Operations: Super Admin can delete assignment files (single file or multiple files upon selection) or reassign the same file of leads to any other user at Super Admin discretion.

Granular Lead Operations: Super Admin can reassign a particular lead or group of leads to another user, or delete a particular lead or group of leads.
