

Block 2

Settings – Dispositions (Pipeline / Status of Client)

- **Location & Creation:** The Dispositions section must be located inside the Settings menu. Only the Super Admin has the authority to create these dispositions (examples include Interested, Not Interested, Call Back Later, Give Demo Call, etc.).
- **Dashboard Integration:** Whatever dispositions are created by the Super Admin in Settings must automatically generate corresponding shortcut buttons on the user-level CRM Dashboard.
- **Call Workflow & Access:** Immediately post-call disconnect, users must update this section to reflect the lead's status.
- **User Roles:** Any user who holds assigned leads—including Super Admin, Admin, Manager, Team Leader, and Executive—must be able to access these disposition buttons to update the status of their leads.
